

## Animal Tracking 101

What would it be like to be able to read the ground as if it were a newspaper, full of the comings and goings of the wildlife around you? This class shows you how to start understanding the many signs animals leave behind, telling us about the who, what, when, where and why of their secretive lives. 10 - Adult.

-------	-----	-----	----------

Free, Pre-Registration required.

## Field Sketching

Every person who enjoys the outdoors can benefit from this class taught by local artist/teacher, Alice Hill. Learn to see the world in a different way through attention to details, patterns and relationships in nature and capture what you see in a sketchbook journal. Only a few materials are needed to record your outdoor adventures in quick lines, colors, and notes. Material list provided. 16 — Adult.

## Birding by Ear

Learn to identify birds by their songs in Laura Whittemore's locally famous "Birding by Ear" class. Tune up your ears with an indoor presentation then go outside to listen carefully to the songs and calls around us. Learn how to listen, how to find singing birds, which sounds males and females make, and how to make those sounds stick so you recognize them again. April class focuses on resident species. May focuses on migrant species. 16 - Adult.

## Morning Bird Song Walks

Develop and hone your ability to identify bird songs by making a commitment of one hour per week for the month April when our resident birds begin singing a lot. We walk slowly, listen and discuss what we are hearing and finally, connect a bird's name to its song. Repetition is the key to developing this skill! Bring binoculars and a field guide if you have them. We begin at 7 am and end around 8 am. You can depart anytime you need to.

# Jackson Bottom Wetlands Preserve Winter/Spring Classes

Winter-Spring registration  
 begins November 15.

## Winter Twig Identification

When the leaves are missing, what can you rely on to identify our common deciduous trees and shrubs? Learn the characteristics of twigs, bark and fruit that distinguish salmonberry from ocean spray and alder from ash. This class begins indoors and then ventures outside where you can put your new-found knowledge to the test – in a fun way! 12 years - Adult.

53292	Sat	1/7	1 - 4 pm
-------	-----	-----	----------

Free, Pre-Registration required.

## PNW Geology I, II, III

Pacific Northwest geology is unique and fascinating. Nowhere else can you find the diversity of landscapes found in Oregon and Washington. In a series of evening classes learn about our rich volcanic history, “recent” events like the great Ice Age Floods that sculpted our region and future events in store for us as part of the Cascadia subduction zone. Taught in non-technical “down-to-earth” language, you can take the whole series or drop-in for the ones that interest you most. 12 years - Adult.

## How to Identify Gulls

There is no such thing as a “seagull” and yet there are more species of Gulls than you think. Learn how to separate them out with the help of bird expert John Rakestraw. Learn the characteristics of plumage, leg color, bill and body size that distinguish the almost one dozen species of Gulls found in Oregon during winter. Class includes a field trip by carpool. 16 - Adult.

\$18 Resident, \$25 Non-Resident

## Introduction to Mason Bees

Learn the basics of mason bees. These solitary bees are very docile and are excellent early spring pollinators. Mason bees are far more efficient at pollination than honey bees. This class is designed to provide an understanding of the mason bee, its needs, and its usefulness. It provides the information necessary to advance into learning how to raise mason bees. 12 — Adult.

*Ron Spendal*

53299	Sat	2/4	1 - 3 pm
-------	-----	-----	----------

Free, Pre-Registration required.

## Cranes & Eagles of Sauvie Island

Two of the largest birds around are plentiful and easy to observe on Sauvie Island, where the Willamette and Columbia Rivers meet. Sandhill Cranes and Bald Eagles congregate here during the winter, as do many species of waterfowl that we are also likely to see. Transportation is provided for this guided wildlife tour. We depart from the Fairgrounds MAX station where you can arrive by train, bus or park your car. 12 — Adult.

53300	Sat	2/18	10 am - 3 pm
-------	-----	------	--------------

\$30 Resident, \$45 Non-Resident

## Raising Mason Bees

Mason bees are easy and interesting to raise. Nesting needs and options will be presented as well as the care of the bee during their life cycle. Following some simple guidelines you will be able to start, grow and maintain a mason bee population for pollinating your garden and landscape. 12 - Adult
